

CHIHUAHUA NEEDS A GOOD HOME

We took him to the vet to get scanned, he does NOT have a microchip. The vet told us he was about 6 months old. He has not been fixed and he plays great with our dog. He likes to pee on everything once he is outside, IE trees, scrubs, light posts, etc. We have been kennel training him since we found him 2 weeks ago. He does great in the kennel and has not had an accident.

He is a good eater and loves to cuddle. He will jump in your lap every chance he gets. He loves to snuggle under blankets and he loves to touching you IE be on your lap, stand by you, etc. He is great with pull rope and has quite the pull. My husband has been training him and he was doing good with "Kennel" when he went to kennel at night and when we leave the house and he was getting better with "sit". He is a good dancer, he knows how to hop around on his back legs and he does not like to be cold. When he had to go out to go pee when it was cold outside he would dance on one foot to the next because his feet would get cold. He jumps on furniture but was not allowed on our bed. He knows this now and does not try to get on it.

We have been calling him "Touille" like the Disney movie "Ratatouille" but I am sure any name will work for him. He also answers to "runt, to-to, little one"

We just want to find him a good home. Please have anyone interested contact us at 801-558-5717 which is my cell #. We are happy to answer questions. I know that he will have a hard time leaving us, any of our family that come to visit and want to see him, he runs to us because we are probably the stable thing for him. But I know he would be great in any family home once he got use to them.
